Azaleas. For Forcing

Special Prices for Import Orders

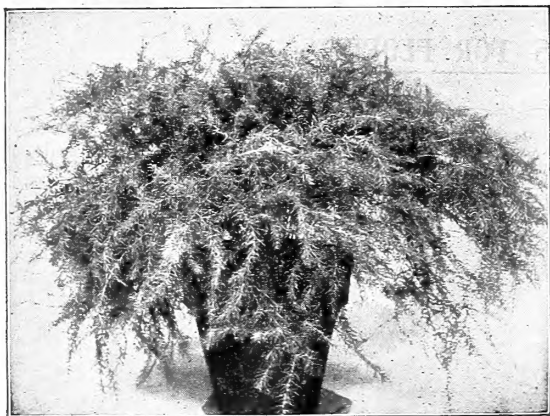

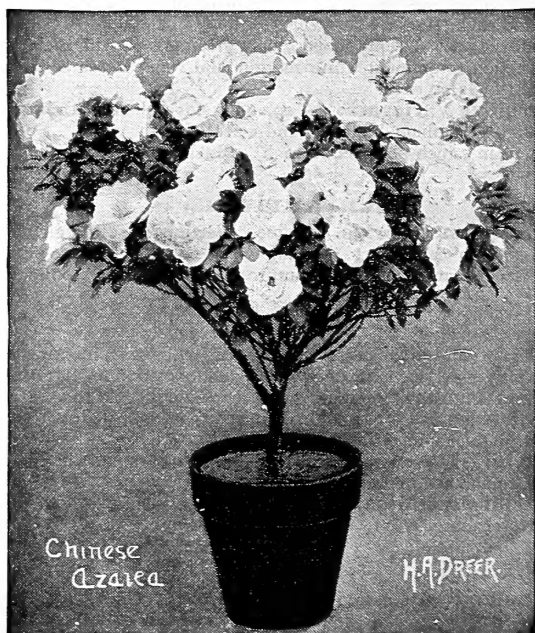

We are the most extensive importers of Azaleas in the country. Our stocks are grown by specialists, the most of whom have been growing them especially for us for many years, and all of the stock handled by us is personally inspected by our own representative before shipped; furthermore, our importations are all sent over in bulk, and are repacked at our nurseries, and any plants which have not carried well, or that are not well set with buds are discarded, thus positively insuring to you only first-class stock, which cannot be compared with cheap assorted case lots, frequently made up in Belgium, and distributed on this side just as received, often containing not only damaged plants, but varieties not suited to the American trade.

If you have never tried our stock, a single order will convince you that we can save you money.

We can supply in any assortment of the popular standard sorts that you may desire, and can include any proportion of Mme. Van der Cruysen that you may wish.

ASPARAGUS PLUMOSUS COMPACTUS

The New Fern-dish Asparagus.

Asparagus Plumosus Compactus.

In this we have a plant that has long been wanted—a dwarf, compact-growing Asparagus which does not exceed six inches in height when fully grown, and one of the most graceful and effective plants for filling Fern-dishes for table decoration ever introduced. 3-inch pots. 20 cts. each; \$2.00 per doz.

Asparagus Myriocladus.

An introduction from South Africa, and very aptly described by a visitor to our nursery as “an aristocratic Asparagus Sprengeri,” from which, however, it is entirely distinct, both in its habit of growth, as well as in the formation of its fronds. The plant is of an almost erect habit of growth, producing fronds from two to four feet long, which, when just unfolding, are of a peculiar metallic bronze, from which they change to a golden-green, finally maturing a rich emerald-green.

Good plants, in 5-inch pots \$2 50 each.

Azalea Mollis. For Forcing.

Practically unknown for forcing purposes until a year or two ago, the Azalea Mollis now holds a most important place, especially for the early winter months, and is gaining greater popularity each season; they are easily manipulated at a minimum of expense, and can readily be flowered any time after the middle of January.

We are handling the stock of one of the most successful specialists and can supply in November fine, bushy plants, 15 inches high, well set with buds, at 4.50 per doz.; \$35.00 per 100.

FINE FERNS

The Boston Fern and its Varieties

THE NEW COMPACT BOSTON FERN. NEPHROLEPIS SCOTTII

Nephrolepis Scottii.

When this variety was introduced about a year ago we predicted that it would soon take the place of the Boston Fern, a strong statement, but one which will, in a very short time be fully realized, it having met with great popularity. To sum up its merits briefly, it can, under the most ordinary treatment, be grown into an ideal specimen of compact shape, which in the ordinary Boston Fern could only be accomplished with the most careful culture, and by giving the plants a large amount of room. Its natural, compact habit admits of almost double the number of plants to be grown in the same space as the regular Boston Fern. We recommend this for extensive planting, as we are certain that you will not meet with the same disappointment as in some of the new varieties introduced

within the last few years, but that you will find this a profitable investment, and a plant that will appeal to your customers on account of its compact, symmetrical and graceful form.

We have a splendid stock of the sizes offered below in strong, clean, vigorous plants, that are certain to give satisfaction.

READY FOR IMMEDIATE SHIPMENT.

2¼-inch pots. Strong plants. \$2.00 per dozen; \$15.00 per 100; \$125.00 per 1000.

3-inch pots. Strong plants. \$3.25 per dozen; \$25.00 per 100; \$200.00 per 1000.

We will have ready about August 1st fine, finished specimens in 5-inch pots, 50 cts. each; 6-inch pots, \$1.00 each.

Nephrolepis Barrowsii.

A new Variety of the Pierson Fern.

In this new variety we have a dense compact form of the Pierson Fern, in which the fronds are not only shorter and broader, but it grows bushier, and what is most important, its fronds are supported on stout, stiff midribs, which gives the plant a much shaplier form. We have every reason to believe that this will hold the same position to the Pierson Fern that Scottii now holds to the old Boston.

We offer fine, strong, vigorous young plants. \$3.50 per dozen; \$25.00 per 100; \$200.00 per 1000.

The New Tarrytown Fern.

Nephrolepis Piersoni Elegantissima.

This is a sport from the Pierson Fern, in which the plummy peculiarity of the original form is even more distinctly developed than in the original, the side pinnæ being again subdivided and standing at right angles to the midrib, makes both sides of the frond equally beautiful, while, at the same time, the plant is of much more compact habit, growing only one-half as tall, but with the fronds nearly twice as wide, making it a much more desirable plant for all purposes.

It grows a very thick, solid and heavy stalk, and has a large heart. It is a close, compact grower, and when blanched is a creamy white color.

Golden Half-Dwarf. The best of the half-dwarf varieties, stalks large and full; the heart is golden-yellow, turning to a light color when blanched. Very solid, rich flavor and good keeper.
